This document presents directions for preparing your abstract. It is written using the formatting instructions outlined below. You may download this document at [Abstract Submission](#), as either a Word or Adobe pdf file, for use as a template for preparing your abstract.

The abstract should be formatted single-spaced, on a page with “US Letter” paper size: 8.5 inch by 11 inch (216 mm by 280 mm). Please use Times or Times New Roman font. The abstract’s complete content (including title, authors, author affiliations, figures, footnotes, references, instructions, *etc.*) must fit on one page within the margins on this template (1 inch top and bottom, 1.25 inches left and right) and limited to no more than 400 words. The title must be 12pt in all **BOLD CAPITALS**, and be centered on the page. Follow the title with a blank line. Use 12pt font for the remaining text. On the next line again centered, type the names of the authors (initial first name, full last name) and their institutions and contact author’s e-mail address, followed by two blank lines. It is assumed that the first name in the list will be the presenter and contact author.

Type the body of the abstract, justified on both sides. Within the space allotted, authors may use diagrams, equations, and other relevant material for which the lettering is at least as large as the typed text.

Abstracts must be submitted as Adobe PDF files and may only be submitted via the [Abstract Submission](#) link at the conference web site. Abstracts submitted via other means will not be accepted.
